

Navigating the Georgia Student Growth Model Data Tool

Georgia Student Growth Model

Total > State : GA

Year: 2013 Assessment: CRCT Subject: Mathematics Grade: 06 Perspective: By District

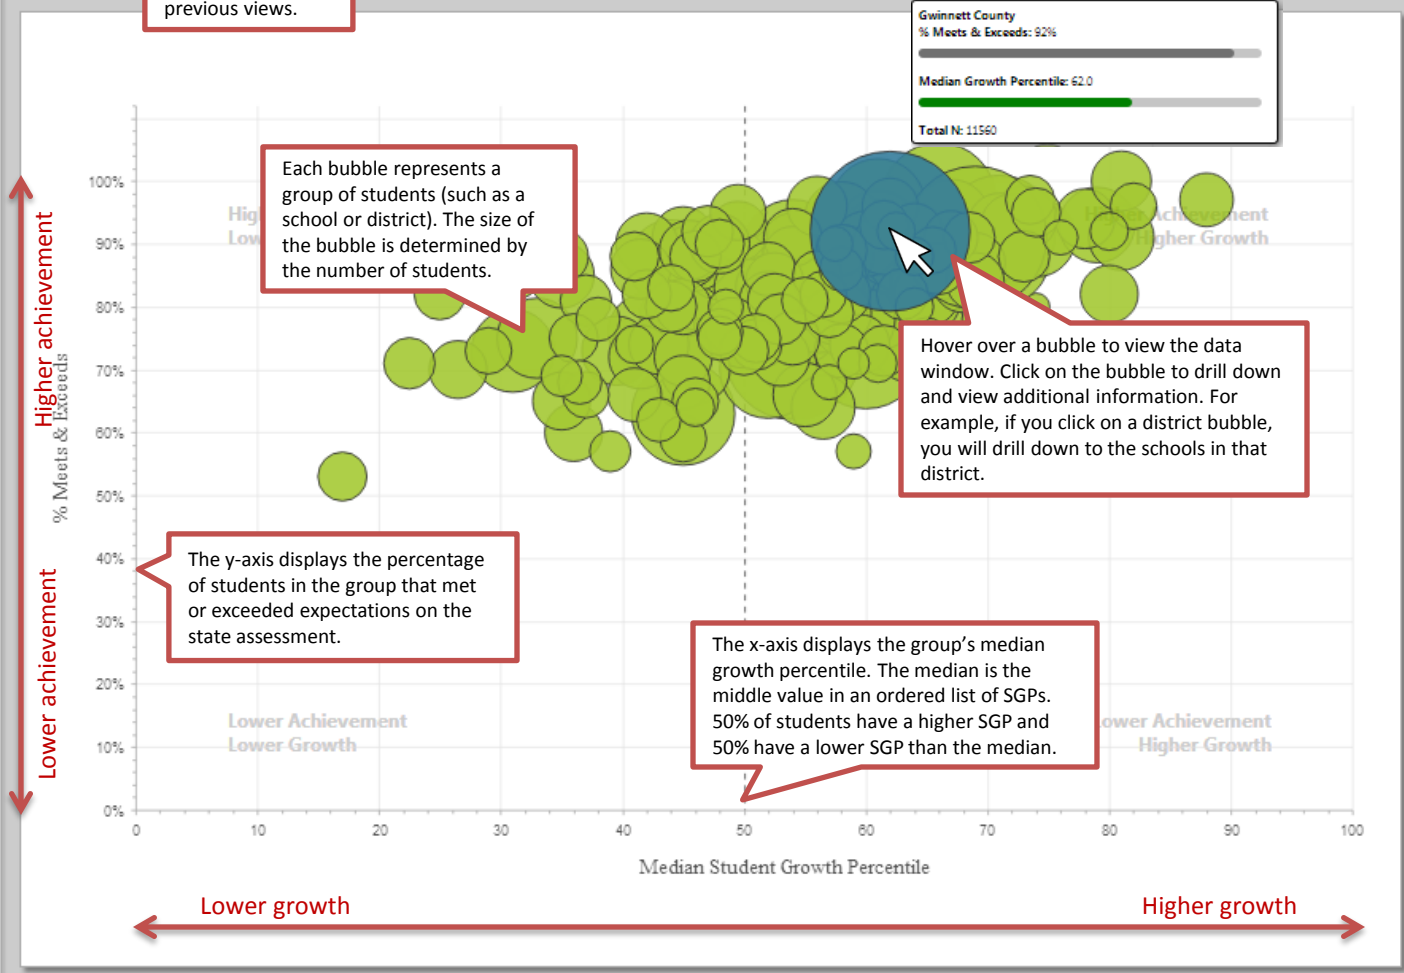

Use the drop-down menus to select the school year, assessment, subject, grade, and perspective.

Visit the GSGM website for more information on SGPs.

Print the current page.

Use the hyperlinks to go back to previous views.

Each bubble represents a group of students (such as a school or district). The size of the bubble is determined by the number of students.

Hover over a bubble to view the data window. Click on the bubble to drill down and view additional information. For example, if you click on a district bubble, you will drill down to the schools in that district.

The y-axis displays the percentage of students in the group that met or exceeded expectations on the state assessment.

The x-axis displays the group's median growth percentile. The median is the middle value in an ordered list of SGPs. 50% of students have a higher SGP and 50% have a lower SGP than the median.
